

Violaine Courier

PhD at INRIA & Withings

✉ violaine.courrier@inria.fr
🌐 <https://github.com/vcourrier>

Experience

- 2023–2026 **PhD student, INRIA Lille & Withings (Lille & Paris)**
Developed a generative model (GCVAE) for guided clustering. Currently extending this architecture with sequence modeling to enable dynamic cluster assignments for time series, allowing individuals to transition between clusters over time.
- May– **Machine Learning research intern, Polytechnique Montréal (Montreal)**
November 2022 Development of a Reinforcement Learning algorithm for solving the Vehicle Routing Problem.
- January– **Machine Learning research intern, Hôpital Européen Georges Pompidou (Paris)**
July 2021 Detection of diagnostics with Named Entity Recognition neural networks.
- June– **Data & Analytics intern, World Economic Forum (Geneva)**
December 2020 Construction of a Speech-to-Text Python library with a Machine Learning Research Scientist, construction of dashboards with the BI team.

Education

- 2021–2022 **2nd year of "Data Science" Master degree, École Polytechnique**
Main subjects : Machine Learning, Deep Learning, Statistics, Optimization.
- 2019–2022 **Engineering school, ENSAE Paris**
Main subjects : Statistics, Machine Learning, Monte Carlo, Econometrics.
- 2017–2019 **Double degree Mathematics & Economics, University Paris-Sud**
Main subjects : Probabilities, Statistics, Analysis, Econometrics, Finance.
- 2016–2017 **Double degree Mathematics & Economics, University d'Evry**
Main subjects : Analysis, Linear algebra, Macroeconomics, Microeconomics.

Languages

- French Mother tongue
English Fluent (TOEIC : 985/990)
Russian High School level (3 years in Moscow)

Computer science

- Languages Python, R, SAS, STATA, SQL, LaTeX
Software Excel, Word, PowerPoint, Tableau

Personal Interests and Activities

- Travels USA, India, Madagascar, Myanmar, Ecuador, Russia...
Activities Running, Dance (6 years), Theatre (7 years), Drums (4 years)
